

ADB TTT PHILIPPINES: UPDATES

ADB TTT ENLAW (PHILIPPINES) GROUP

- Web-based (Facebook) Network of Environmental Law Teachers in the Philippines
 - **ADVANTAGES**
 - Real-time sharing of teaching methods and materials (with photos and songs)
 - Example: Counting Crows' Big Yellow Taxi as a teaching tool for Environmental Impact Statement System (EIS) Law
 - Environmental advocacies of law professors (e.g., Earth Hour, Benham Bank, Climate Change, etc.)
 - Less resource-intensive, practical For busy professors and environmental advocates living in an archipelagic country like the PH

ADB TTT ENLAW (PHILIPPINES) GROUP

- Web-based (Facebook) Network of Environmental Law Teachers in the Philippines
 - **DISADVANTAGES**
 - Limited participation especially for those less/non-active users of social media
 - Free-flowing, non-structured interaction (e.g., the “seen” zoned phenomena)

ADB TTT ENLAW (PHILIPPINES) GROUP

- OTHER INITIATIVES

- Shared TTT Philippines initiatives and resources to other laws schools and teachers
- Generated interest from other law professors who were not included in the original TTT ENLAW (PHILIPPINES) GROUP
- Improved teaching skills using creative teaching methods and tools shared during the TTT

NEXT STEPS?

- There is a suggestion to have point persons for each major island grouping – Luzon, Visayas, and Mindanao – to ensure:
 - Continuous interaction between, among and beyond TTT alumni
 - Regular updating about teaching and advocacy activities
 - Hosting of meetings (if possible)
